

## REMOTE CONTROL KIT FOR CONVENTIONAL VEHICLES

*Tracked vehicle*

*Wheeled vehicle*

*Quad*

*Remote controlled uninhabited vehicles*

*Trailer laboratory for C<sup>2</sup> system*

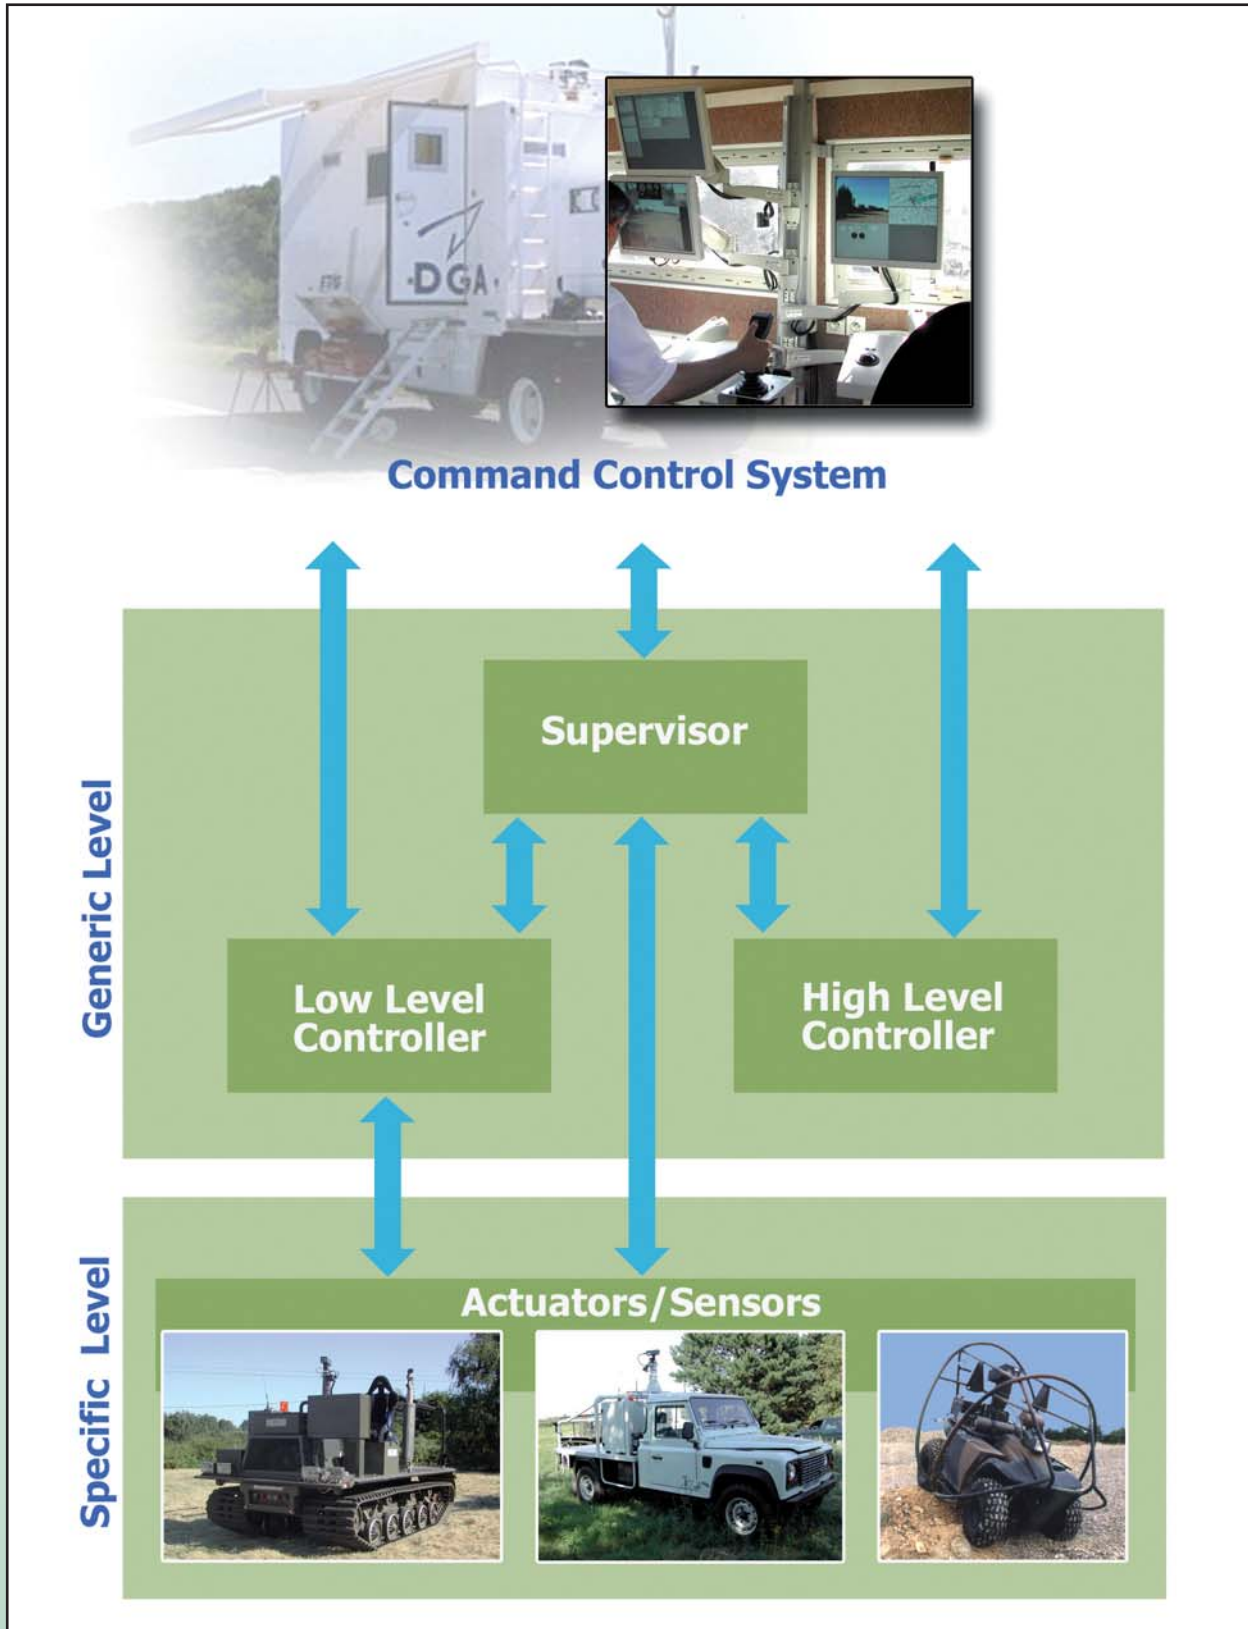

The remote control operation kit of modular design is adaptable to any mobile platform and can be reconfigured in-situ onboard.

### Advantages of open platform

- Adding/experimenting high level modules with several modes (remote / autonomous operation)
- Instant adding of new sensors / functions (onboard)
- Test new MMI configurations and their effect on pilot operation or mission efficiency
